QKJ-II

INDUSTRIAL HORIZONTAL AUTOMATIC
MEAT SLICER WITH PORTIONING FUNCTION

INDUSTRIAL HORIZONTAL AUTOMATIC MEAT SLICER WITH PORTIONING FUNCTION

MODEL: QKJ-II

The QKJ-II Industrial Horizontal Automatic Meat Slicer is designed for continuous-duty slicing applications in meat processing environments requiring stable cutting performance, programmable thickness adjustment, and industrial production capability.

Engineered for processed meat, chilled meat, semi-frozen products, bacon, ham, sausage, luncheon meat, and bone-in applications, the system combines heavy-duty mechanical construction with industrial automation components to support reliable slicing operation in central kitchens, meat processing facilities, supermarket commissaries, and food production environments.

The machine adopts circular blade slicing technology with programmable slicing parameters and portion-based grouping capability, offering stable industrial performance for medium to high-throughput production requirements.

FITUR:

- **Industrial Horizontal Slicing Architecture**
Heavy-duty horizontal slicing system designed for continuous industrial production environments.
- **Programmable Thickness Adjustment**
Adjustable slice thickness ranging from 1–32 mm for various meat and processed food applications.
- **Portioning Function**
Supports quantity-based portion grouping according to production requirements.
- **Heavy-Duty Feeding System**
Precision feed stabilization mechanism designed to improve slicing consistency during operation.
- **Industrial Automation Components**
Equipped with internationally recognized electrical and automation components.
- **Circular Blade Technology**
Large-diameter circular blade system designed for stable industrial slicing applications.
- **Hygienic Stainless Steel Construction**
Machine body manufactured with stainless steel construction suitable for food processing environments.
- **Safety Protection System**
Integrated emergency stop and safety interlock protection for operational safety.

FOOD SERVICE EQUIPMENT & SUPPLIES

QKJ-II

INDUSTRIAL HORIZONTAL AUTOMATIC
MEAT SLICER WITH PORTIONING FUNCTION

TECHNICAL SPECIFICATIONS:

MODEL: QKJ-II

Machine Type	:	Industrial Horizontal Automatic Meat Slicer
Portioning Function	:	Yes
Slice Thickness Range	:	1–32 mm
Maximum Cutting Speed	:	Up to 160 slices / minute
Feeding Channel Size	:	250 × 180 × 700 mm
Applicable Product Temperature	:	0°C to -5°C
Installed Power	:	5 kW
Machine Weight	:	Approx. 600 kg
Machine Dimensions	:	2580 × 980 × 1350 mm
Cutting System	:	Circular Blade Technology
Operation System	:	PLC + Touchscreen
Machine Construction	:	Stainless Steel
Recommended For	:	Meat processing factories, Central kitchens & Supermarket commissaries

DIMENSION:

QKJ-II

INDUSTRIAL HORIZONTAL AUTOMATIC
MEAT SLICER WITH PORTIONING FUNCTION

ELECTRICAL & CONTROL COMPONENTS:

COMPONENT	BRAND / ORIGIN
Main Motor	Nord – Germany
Servo Motor & Drive	Panasonic – Japan
PLC	Omron – Japan
Inverter	Delta – Taiwan
Touchscreen HMI	Weintek – Taiwan
Electrical Components	Siemens – Germany

MACHINE CONSTRUCTION:

The QKJ-II utilizes an industrial-grade slicing chamber with integrated feed stabilization mechanism and conveyor discharge system.

Available feeding chamber configurations include:

- Horizontal feeding type
- Tilted feeding type

The machine incorporates direct servo-driven synchronization between the blade and feeding system to support stable slicing performance during continuous operation.

HYGIENE & SAFETY:

Hygiene Features • Stainless steel construction • Open-access cleaning structure • Accessible feeding chamber • Washable slicing chamber • Industrial food-contact design	Safety Features • Emergency stop system • Safety interlock protection • Blade chamber protection cover • Operator safety guarding
--	--

OPERATIONAL NOTES:

The QKJ-II is designed as an industrial slicing platform with programmable slicing capability and quantity-based portion grouping.

The system is optimized for:

- industrial slicing stability,
- medium-to-high throughput production,
- and continuous-duty operation.

The machine is not designed as an advanced intelligent weight-based portioning system with infrared scanning or AI-driven portion optimization.

OPTIONAL CONFIGURATIONS:

Optional configurations may include:

- Stainless steel cover upgrade
- Different feeding chamber arrangements
- Conveyor customization
- Blade configuration options

INDUSTRIAL POSITIONING:

The QKJ-II is positioned as:

Industrial Heavy-Duty Horizontal Meat Slicer with Basic Programmable Portioning Capability

Suitable for industrial processors seeking:

- stable slicing performance,
- industrial-duty operation,
- and cost-optimized automation solutions.
