### Features:

- ▶ **Integrated control functions**  
PT-500 has numerous control functions which further reduces staff workload. Tank and boiler temperatures can be shown on the display at any time. Simple symbols warn the personnel when there is a lack of detergent and rinse aid. A leak sensor monitors uncontrolled water outflows and shuts off the machine's water inlet. Thus PT-500 guarantees process reliability and prevents resulting damage.
- ▶ **Time-saving hygiene concept**  
A deep-drawn tank, a hygiene tank heater and a hygiene rear panel prevent limescale and dirt deposits. These components guarantee that the interior of the machine is clean at all times. In addition, the self-cleaning programme considerably reduces kitchen staff workload.
- ▶ **Extremely easy to use**  
To ensure untrained, frequently changing staff can learn to use the machine quickly, PT-500 has a colour coded display showing the various Machine states; heating, washing and standby. Selected washing programmes are also started using the single-button control or automatic hood start. The unique, ergonomic hood handles support effortless operation of the machine especially on long working days.
